

NAME

`sjisconv` – convert a TeX document in SJIS encoding into ‘preprocessed’ form.

SYNOPSIS

sjisconv < *infile* > *outfile*

DESCRIPTION

SJIS encoding for Japanese uses the characters { , }, and \ which have special meanings in T_EX documents.

After processing a L^AT_EX 2_ε document which contains SJIS characters with **sjisconv** you need not care about these special characters.

This filter is part of the **CJK** macro package for L^AT_EX 2_ε.

SEE ALSO

bg5conv(1), **cefconv(1)**, **cef5conv(1)**, **cefsconv(1)**, **extconv(1)**,
the **CJK** documentation files.
